

# Građevinski sektor kao pokretač razvoja gospodarstva

Mihovil Šušnić<sup>1</sup>

*Sadržaj* – Gospodarska kriza doprinjela je propasti velikog broja poduzeća, a to je rezultiralo i gubitkom velikog broja radnih mjesta čime se stopa nezaposlenosti drastično povećala. Gospodarska kriza najviše je i među prvima pogodila građevinski sektor. Građevina je industrijska grana koja na sebe veže veliki broj drugih industrija. Destabiliziranjem građevinske industrije i mnoge druge industrije poput drvne industrije, proizvodnje cementa, sanitarija, mnoge željezare, osjetile su drastičan pad obima posla i prihoda te su bile prisiljene otpuštati ljude.

U radu će se dati pregled stanja građevinske industrije unazad nekoliko godina, kako bi se ukazalo na činjenicu da je iznimno važno učiniti velike napore kako bi se građevinski sektor ponovno pokrenuo jer se jedino pokretanjem građevinskog sektora i kapitalnih ulaganja u građevini može ponovno pokrenuti gospodarstvo i otvoriti radna mjesta te na takav način smanjiti nezaposlenost, povećati potrošnju i BDP te izvući gospodarstvo iz recesije. Od 2008. godine građevinska industrija krenula je propadati što je pridonijelo opadanju i drugih industrija, a to je produbilo i produžilo recesiju u kojoj se našlo gospodarstvo Republike Hrvatske.

*Ključne riječi* – građevinska industrija, nezaposlenost, vezane industrije, kapitalna ulaganja, pokretač gospodarstva

# The construction sector as an engine of economic development

Mihovil Šušnić struč.spec.oec.<sup>2</sup>

**Summary** - The economic crisis has contributed to the collapse of many companies, which resulted in the loss of many jobs which the unemployment rate has drastically increased. The economic crisis is the most and among the first to hit the construction sector. Construction industry is the industry that binds a large number of other industries. With destabilizing the construction industry also the many other industries such as wood industries, cement production, sanitation, many steel mills, experienced a drastic fall in the volume of work and income, and were forced to lay off workers. This article will provide an overview of the situation of the construction industry in the last few years, in order to point to the fact that it is extremely important to make great efforts to restart the construction sector, because only by starting the construction sector and capital investments in construction we can rebuild the economy and open new workplaces. If we do that, we will be able to reduce unemployment rate, increase personal and public consumption and GDP and pull the economy out of recession. Since 2008., the construction industry started to fall, that situation had contributed to the fall in other industries, and that situation has deepened and prolonged the recession in which is found Croatian economy.

**Key words** – construction industry, unemployment, related industries, capital investments, accelerator of economy
